Becoming carbon neutral by 2020

Philips commits to becoming carbon neutral by 2020 at the UN Climate Change Conference COP21

From 2007 until 2015, Philips expects to have reduced its carbon footprint by 40%, but wants to accelerate its emissions reductions and achieve carbon neutrality in the next five years.

Importance of efficient lighting solutions

Lighting accounts for 19% of the global electricity consumption.

Connected LED lighting can deliver energy savings of up to 80%.

Philips has undertaken more than 260 connected street lighting projects around the world since 2011.

The global transition to LED lighting will bring an energy saving of 53% by 2030 compared to business as usual scenario.
